Jarred artichokes don’t often steal the stage the way fresh ones do (see p. 56), but we’re partial to these preserved varieties. La Dispensa di Amerigo’s artichokes in Modena balsamic vinegar (left) and De Carlo’s grilled artichokes (right), stand apart from their peers because they retain their meaty structure, aren’t too soft and their light brines don’t drown out their flavors. Eat them on their own, or substitute them for fresh ones in recipes. Find out more at amerigo1934.it and oicocdecarlo.com.

**Easter Bread**

**Colomba di Pasqua**

Colomba di Pasqua graces Easter tables throughout Italy, taking its place next to a traditional meal of lamb—the standard fare for this holiday of rites. Colomba means dove in Italian, and often the bread is shaped in this symbol of peace. Similar to panettone, it’s typically flavored with amaretto and candied citrus or dried fruit, topped with an egg wash, and sprinkled with sliced almonds and sugar. Look for this Easter treat during the holiday season at your local specialty or Italian food store.
